## Instructions

^ COLLAPSE ^

Overview Video: <https://youtu.be/tSavhn26XI0>

1. Create a repository on github, use the format `ucid-course-section` as the repository name.
2. Make sure it's set to private
3. Go to Settings -> Manage Access -> Invite Collaborator -> Search for my ID **MattToegel** and send an invite; if your section has a grader do the same for their github username (refer to course announcements)
  1. **Note:** Once in a while the invite doesn't get created correctly and you'll need to resend it, keep an eye on the acceptance of the invite since this is required for further HW validations. A comment will be left on Canvas for the submission if the invite is missing at the time of grading).
4. From the terminal / command line create a new branch called **M1-GettingStarted**
5. Create a README.md file and add it to the branch
6. Fill in some basic details:
  1. Course/Section
  2. Your name (first is fine)
  3. Brief info about yourself you'd like to share
7. Hint after creating the file
  1. `git add README.md`
  2. `git commit -m "my readme file"`
  3. `git push origin M1-GettingStarted`
  4. Create a pull request from this branch (via github.com)
  5. Don't merge/close the pull request yet
8. Fill in the below deliverables.
9. Once finished, ensure it's saved and click the "Export" button.
10. Move the generated PDF into your local repository folder at any location of your choosing.

# 11. Do the following commands

1. `git add .` (this will add all changes)
2. `git commit -m "adding output file"`
3. `git push origin M1-GettingStarted`

# 12. Go back to github and merge the pull request that was opened

# 13. Go to Canvas and upload the same PDF that you just downloaded and pushed to GitHub

**Note:** Having the submission saved and active keeps it eligible for grading.

Branch name: M1-GettingStarted

Tasks: 4 Points: 10.00

Github Setup Evidence (2 pts.)

^COLLAPSE ^

Task #1 - Points: 1

Text: Github Steps

#1) Show that an invite was set to me and the grader

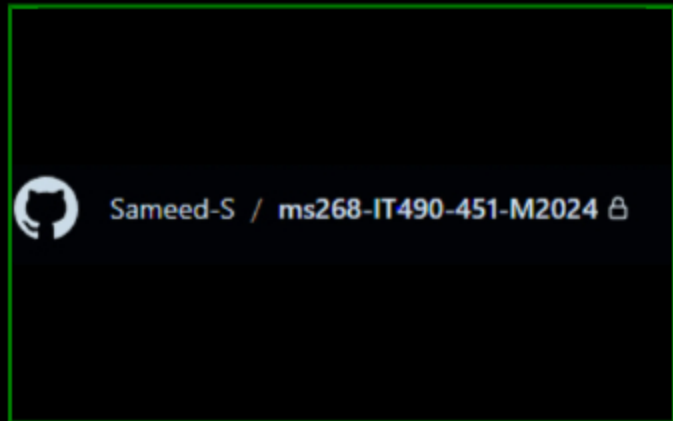

**Caption (required)** ✓

*Describe/highlight what's being shown*

It shows that Professor and TA/Grader have been sent an invite

#2) Show that your repository is set to private

**Caption (required)** ✓

*Describe/highlight what's being shown*

lock icon shows that it is private

Reflection (6 pts.)

^COLLAPSE ^

^COLLAPSE ^

### Task #1 - Points: 1

Text: Talk about what you learned during this module, anything interesting, new, etc.

#### Details:

Should be at least a few sentences for full credit

Response:

This was my first time setting SSH and Github on my Windows previously i have done it with my Mac so it was quite intressting doing the setup with this as well. I am looking forward to what the future holds in this class. I also did some github quiz and homework which was intresting to just recap everything github relayed

^COLLAPSE ^

### Task #2 - Points: 1

Text: Did you have any issues? If so, how did you resolve them? If no issues, just type "no issues"

Response:

Had a small issue with not having SSH set up on my Windows computer however i messaged the professor and he was able to explain what i was missing. I also did a quick google search to help me fill in the blanks. Nothing too crazy yet.

^COLLAPSE ^

### Pull Request (2 pts.)

^COLLAPSE ^

### Task #1 - Points: 1

Text: Add the pull request link here (it should end in /pull/#)

<https://github.com/Sameed-S/ms268-IT490-451-M2024/pull/1>
